REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

Claims 1-16 are allowed because the prior art references of record fail to teach or suggest a liquid injection apparatus comprising an acquisition device that acquires the information stored in a memory element of a liquid container mounted on a carriage and information stored in a memory element which is provided in a replacement liquid container replaceable with the liquid container mounted on the carriage and stores information about retained liquid, wherein a first communication section is connected to each memory element, and wherein the acquisition device has a second communication section communicatable with each first communication section in a non-contact manner for acquiring the information stored in each memory element in the combination as claimed.

Claim 7 allowed because the prior art references of record fail to teach or suggest a liquid injection apparatus comprising a control section which controls a moving mechanism to move a carriage to a replacement position from a standby position regardless of an operation of an operation portion, the operation portion which is operated to move said carriage to a replacement position from a standby position, when a determining section has determined that replacement with a replacement liquid container should be performed and to move the carriage to the replacement position from the standby position regardless of a determination by said determination section when the operation portion is operated in the combination as claimed.

CONCLUSION
